

The church Sound System will stream everything that comes out of the speakers at Holy Cross right to your smartphone, allowing you to control the sound level with their phone!

If you would like to try it, do the following:

1. Download to your smartphone the *Listen Everywhere* app. It is a free app available on both the Google Play store and the Apple iOS Store.

2. Connect to the *HC Sound System* Wi-Fi network in the church. The password is: 1979bcprayer
3. Open the *Listen Everywhere* app, ensure you have headphones or earphones connected to your phone, and tap on the Holy Cross channel and then press that standard play triangle. Everything that comes out of the speakers in church will be streamed to your ears and you can control the volume to your desired setting right from your phone.

We recommend that you press play and listen via the app only when one of the clergy are speaking, or when someone is speaking from the pulpit, or when someone is speaking while holding the wireless microphone.

Note: Please DO NOT press play and utilize the speakers on your smartphone. You and everyone else will hear the squealing feedback as the sound loops through the church speakers and your phone speakers!
